

Epic Services

EPIC IMPLEMENTATION SERVICES

1 PROJECT MANAGEMENT

Our trained consultants can manage all aspects of an implementation while using their expertise on multiple previous installations to come up with quality work plans

2 BUILD

We have over 30 Epic certified consultants available to configure every module of Epic.

3 TRAINING AND SUPPORT

We can help put together scenario based training curriculum and deliver the training in a class-room environment. We can also create eLearning materials for online use. We can also provide quality floor support during and post Go-Live

4 INTEGRATION

Unparalleled expertise with Epic Bridges and Interface Engines like Intersystems Ensemble, eGate, Cloverleaf and others to enable Enterprise Workflows and HL7 based integration with your ancillary systems.

Epic implementation services on time and at the right price

Epic Installations

A CIO recently recommended to the board of a multi-hospital health system that the organization purchase and install Epic's suite of software products. He said, and we paraphrase: Implementing the Epic software including CPOE will be as expensive and more risky than building a new hospital.

Clearly, an Epic implementation is one of the most important strategic projects an enterprise can undertake.

Hospitals implement a Clinical Information System with significant expense to support clinical efficiency and decision making with a user friendly and interactive system focusing on improvement in:

- Outcomes
- Care Coordination and communication
- Patient Safety
- Remote access to clinical information, etc.

The critical requirements for most organizations include:

- Online clinical documentation
- Computerize Physician Order Entry (CPOE)
- Electronic Patient Assessments and Medications Management
- Clinical Data Repository
- Clinical Decision Support
- Integration with other IT systems
- Wireless and Remote Access

Epic Systems software enables this and other features to allow for quality delivery of healthcare.

314e has been providing Epic implementation services to a number of Provider organizations around the country. Our consultants bring a healthy mix of

Clinical and IT experience along with certifications in Epic's various modules including:

- ◆ eHealth
 - ▶ MyChart
